

Maps of STAAR Passing Rates, 2012–2013

Purpose. These maps were requested by the Office of Academics as part of a data presentation for a meeting of the District Literacy Workgroup. The purpose was to present State of Texas Assessments of Academic Readiness (STAAR) passing rates for each campus, for grades 3 through 12.

Questions answered. What percentage of students met the STAAR writing and reading test standards within each elementary, middle, and high school attendance zone? What percentage of students met the STAAR writing and reading test standards, for each test version, in each elementary, middle, and high school?

Data elements and methodology. The percentage of students passing STAAR reading and writing tests are mapped by elementary, middle and high school attendance zones and by campus.

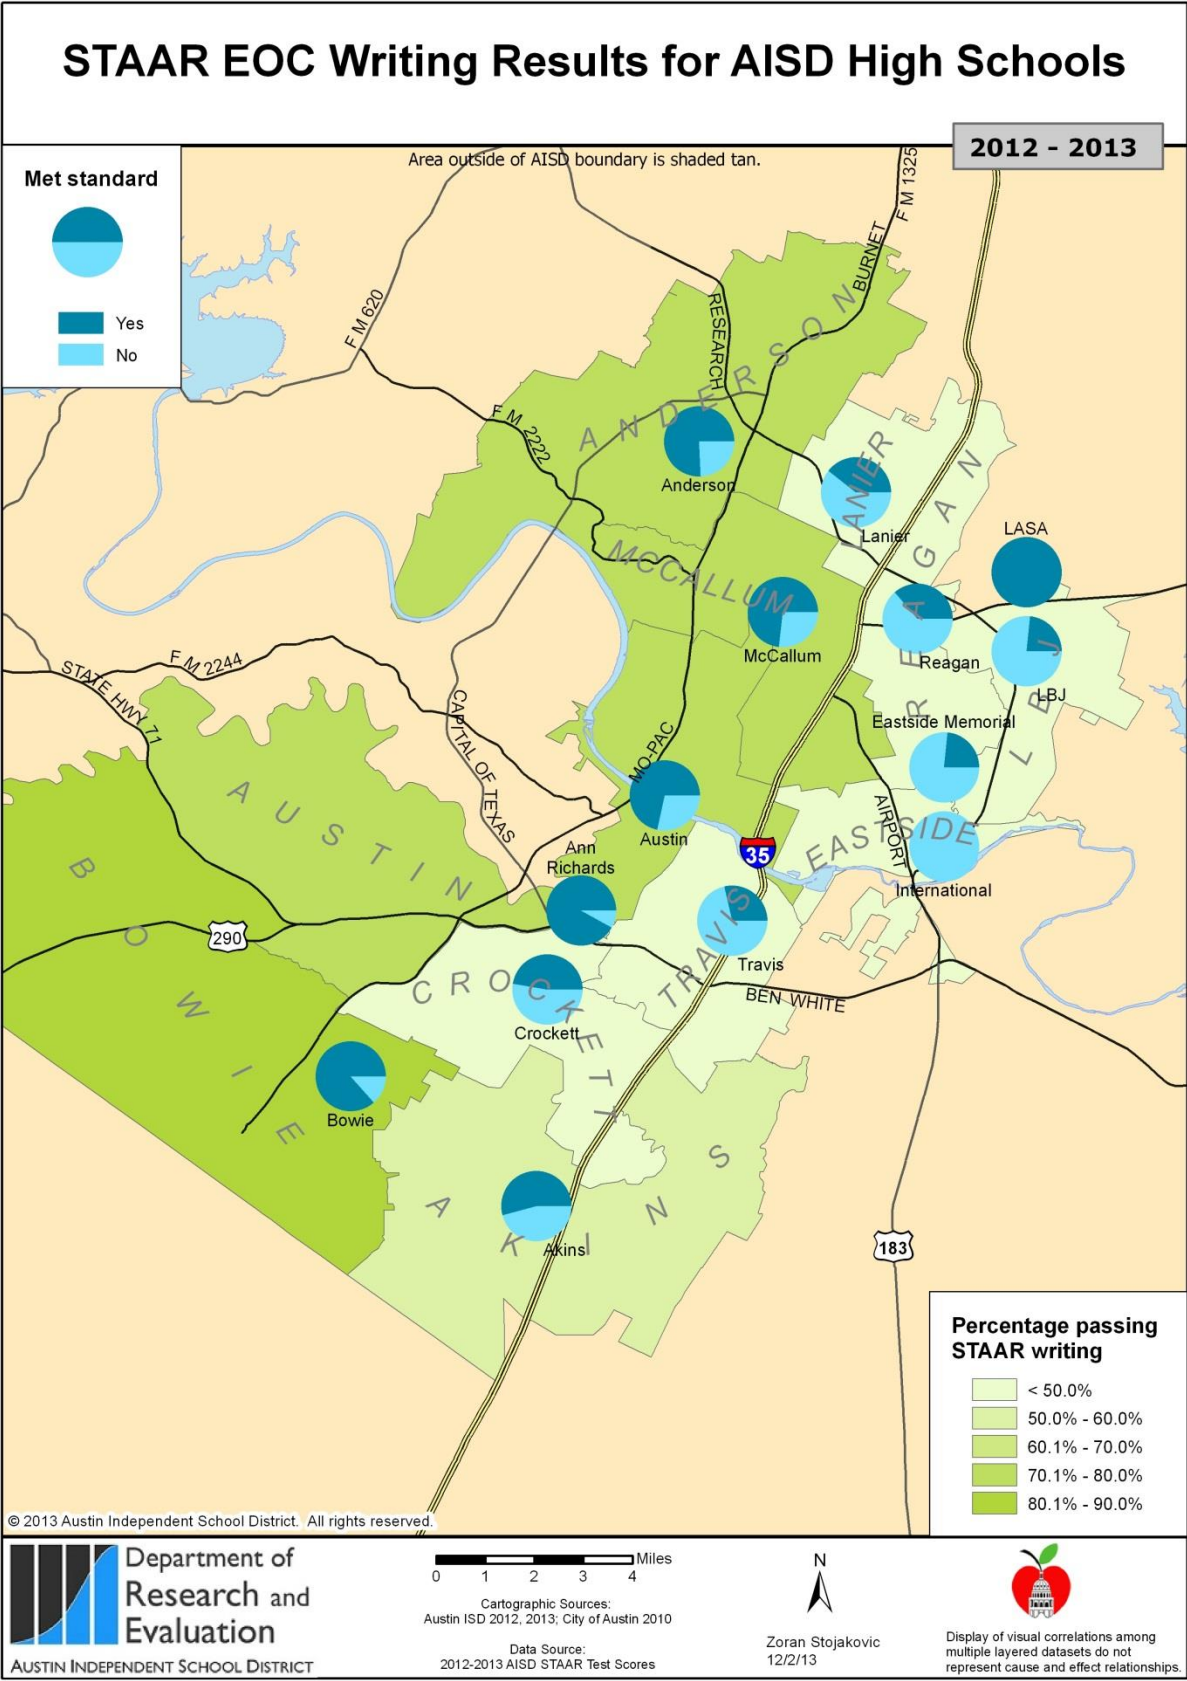

Conclusions. The distribution of STAAR passing rates for each geographic area is evident on these maps. Among high schools, LASA High School (100% reading and 99% writing); Ann Richards School (98% and 92%, respectively, grades 9 through 12 only); and Bowie High School (91% and 87%) had the highest passing rates. The lowest passing rates were at International High School (6% reading and 0% writing), Eastside Memorial (45% and 23%), LBJ High School (44% and 23%), and Travis High School (41% and 29%).

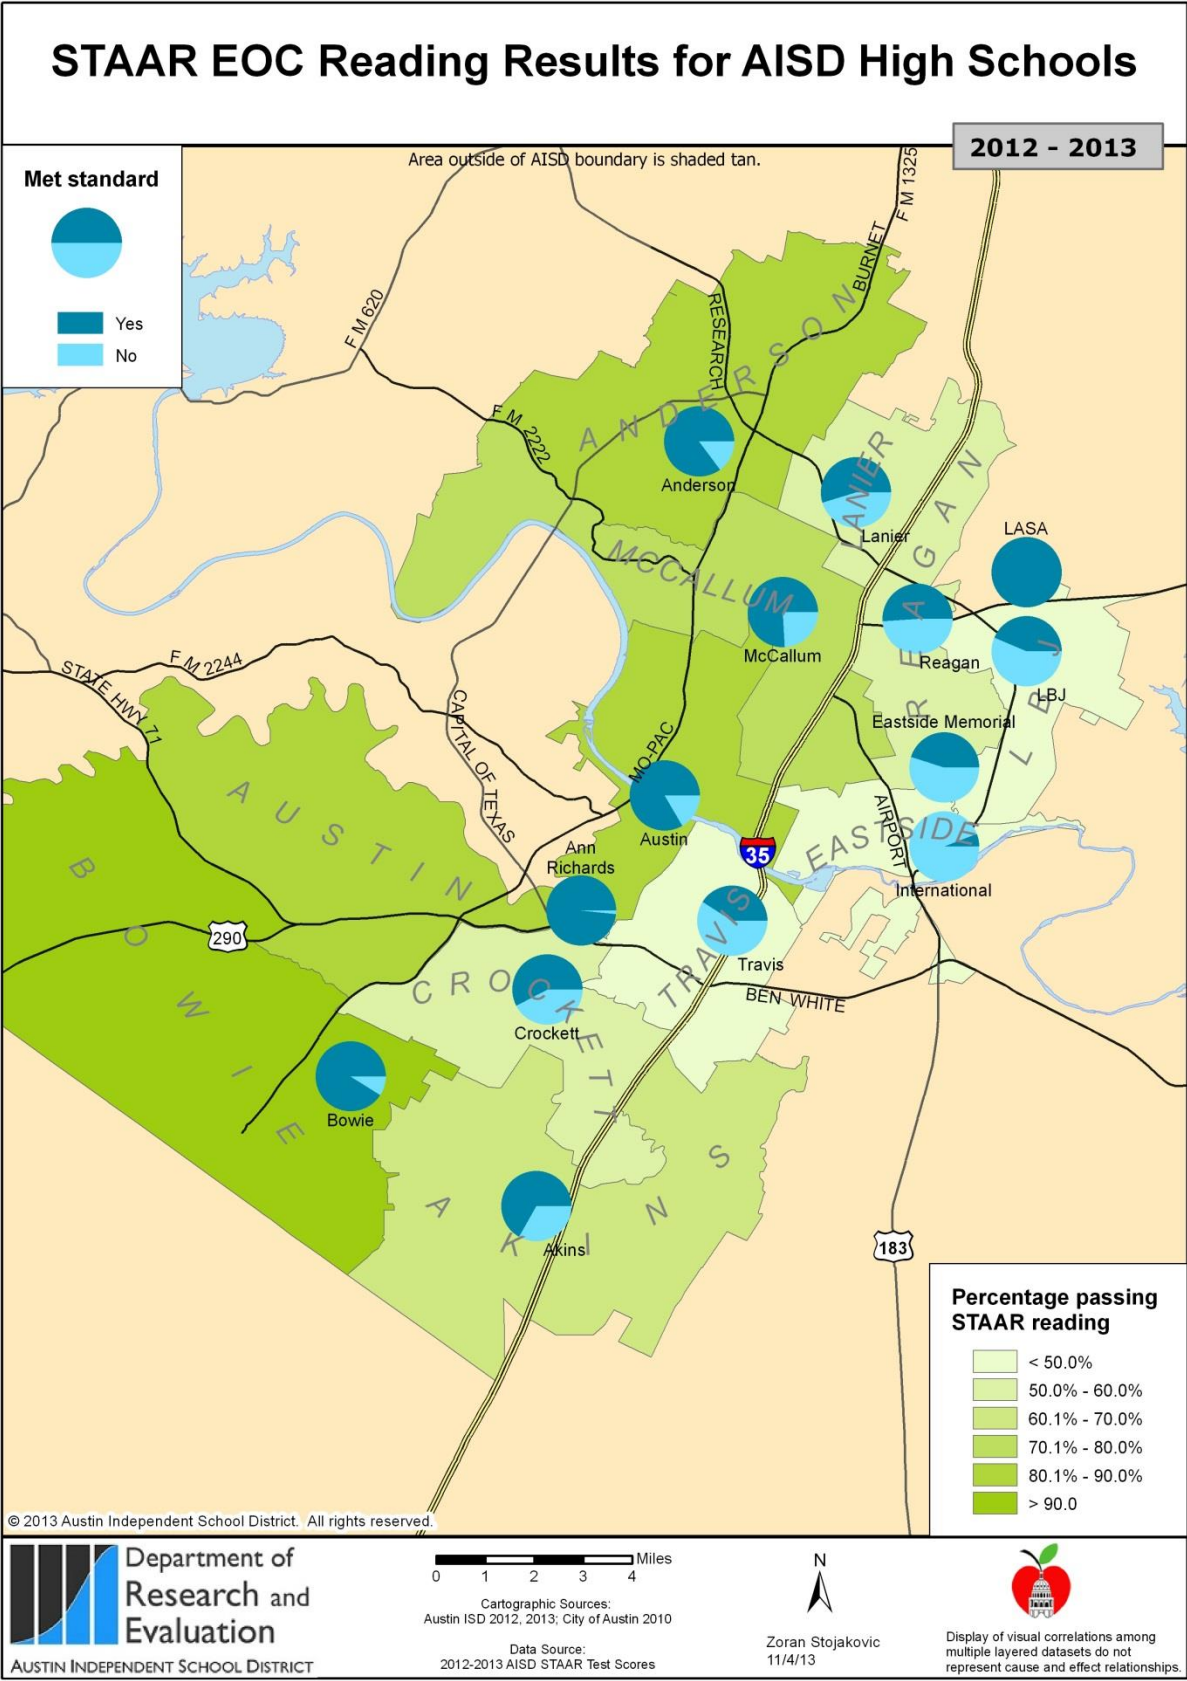

In middle schools, Ann Richards School had the highest passing rate (98% reading, 95% writing, grades 6 through 8 only), followed by Gorzycki Middle School (97% and 93%) and Murchison Middle School (87% and 80%). The lowest middle school passing rates were in Dobie Middle School (44% reading and 35% writing), Garcia Middle School (46% and 39%), Mendez Middle School (48% and 38%), and Martin Middle School (49% and 36%).

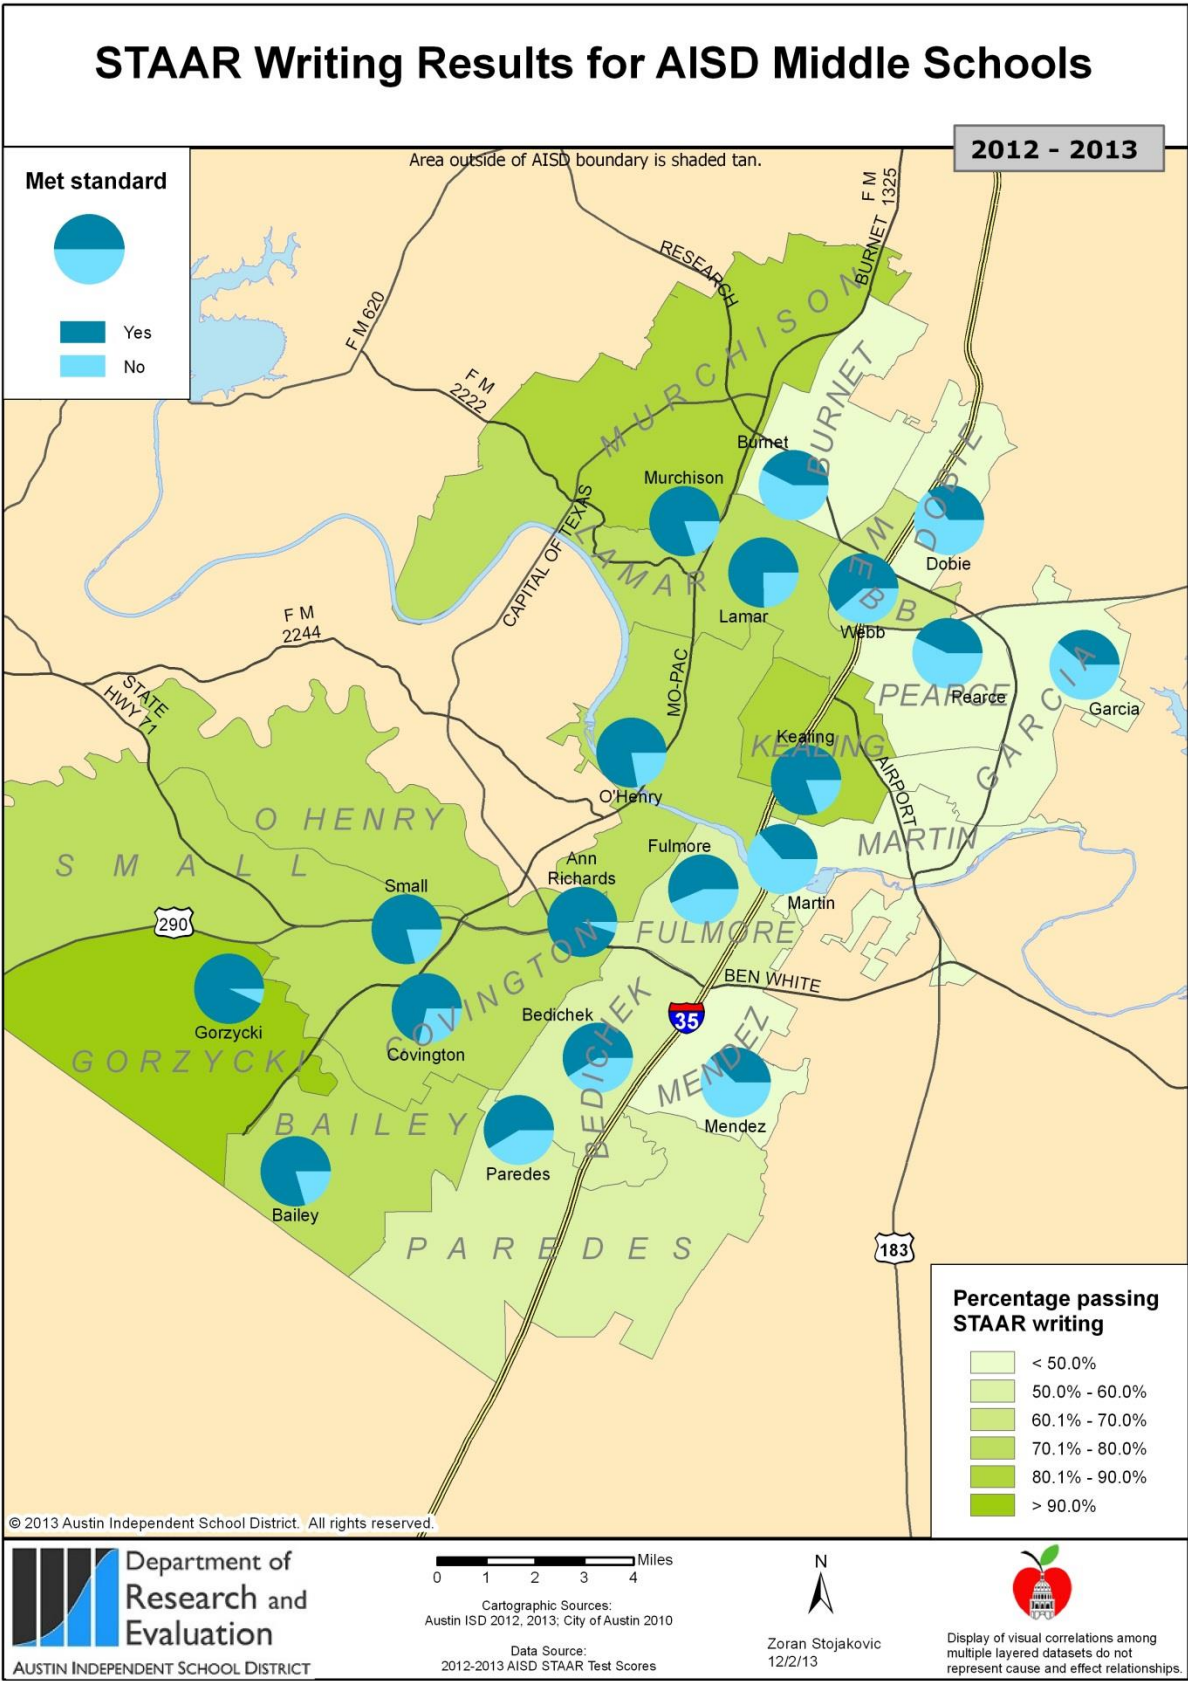

Unlike at middle and high schools, where students are only tested in English, elementary schools also test students in Spanish when appropriate. Elementary schools that had the highest STAAR passing rates for reading and writing tests were Casis Elementary School (99% reading and 96% writing), Kiker Elementary School (98% and 97%), and Highland Park Elementary School (98% and 97%). The lowest passing rates in reading were at Brown Elementary School (48%), Houston Elementary School (52%), and Linder Elementary School (52%), and the lowest passing rates in writing were at Sims Elementary School (39%), Widen Elementary School (41%), and Galindo Elementary School (43%).
